

Lost Child Finder

PROBLEM: Children can become separated from their parents in large venues or at events.

OUR SOLUTION: We offer an easy way for organizations to send text message alerts with a photo to their security staff to quickly find lost children.

HOW IT WORKS

STEP 1

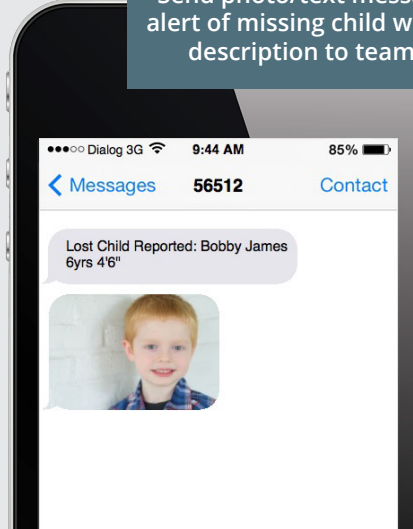

Create today's list of security team contacts.

Every morning our system sends an opt-in text to security team members confirming list participation for today.

STEP 2

Send photo/text message alert of missing child with a description to team.

When a parent reports missing child to a member of security, a text is sent with an image into our system. We then forward the message to the security staff.

STEP 3

Security staff responds with updates.

Security personnel are able to stay up-to-date on status and report when the child is safe and sound.

OTHER USES

Report suspicious persons: Allow visitors and security team to report suspicious activity.

Remind about fire drills: Tell employees and visitors about emergencies in the building or area.

Send emergency alerts: Alert security team and visitors immediately about emergencies in the building or area.

ORGANIZATIONS

- Airports & Hotels
- Parks & Gardens
- Zoos & Aquariums
- Historical Sites
- Museums & Libraries
- Government & Cities
- Malls & Shopping Centers
- Parking Garages
- Police
- Large Events & Festivals
