

Convenient and Flexible Ride Booking for You Organization

So you already offer transportation for your clients, but you're constantly fielding cancellation calls, impatient riders, and new needs. What if this could all be handled by a few taps on a screen?

You don't have to be Uber or Lyft to provide apps and alerts to your clients! Engage by Cell's Ride Booking and Management platform allows users to book a car and drivers to transport them, just like a taxi.

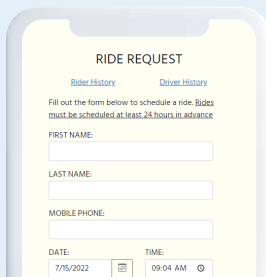

How Does it Work?

1.

Users

Users request rides through a branded calendar page and receive notifications via automated text messages. No sign-up or sign-in required.
